EXPLANATION OF CHANGES IN THIS ISSUE OF THE STATISTICAL REPORT

Because of growing concern over constantly increasing expenditures from county poor funds for the provision of medical care and hospitalization to indigents, a number of tables, beginning with this issue of the STATISTICAL REPORT, have been revised to include certain medical expenditures not previously included in the report. Among such expenditures are those for county physicians, hospital contracts, the operation of county farms, rest homes and hospitals, and miscellaneous drugs and medical supplies. Medical care as reported in tables I and XIII now includes expenditures for county physicians, other medical practitioners, drugs and medical supplies. Hospitalization, in the same tables, includes private hospitals, county hospitals, nursing homes, and county farms and rest homes.

Although data are now available on the amounts expended by counties for all medical purposes, a complete count of the number of persons receiving such services is not presently available for the following reasons:

1) Most counties are unable to report the number of persons served by county physicians.

2) A few counties are unable to report the number of hospital cases under lump-sum-payment agreements.

Until complete data are available, information on the number of persons receiving medical care and hospitalization will not be published.

In addition to the changes mentioned above, the phrase "general relief subsistence" has been changed to "general assistance" in tables I, II, III, XI, XII, and XIII to reflect current usage. General assistance is defined as cash or disbursing orders granted to individuals or families to meet maintenance needs in their own homes or in boarding homes; it does not include medical care, hospitalization or nursing home care.
